# Forward Looking Statements

## Non-GAAP Financial Measures

---

Statements contained in this presentation with respect to the future are forward-looking statements. These statements reflect management's reasonable judgment with respect to future events. Forward-looking statements involve risks and uncertainties. Actual results could differ materially from those anticipated as a result of various factors, including adverse economic conditions, industry competition and other competitive factors, adverse weather conditions such as high water, low water, tropical storms, hurricanes, tsunamis, fog and ice, tornados, COVID-19 or other pandemics, marine accidents, lock delays, fuel costs, interest rates, construction of new equipment by competitors, government and environmental laws and regulations, and the timing, magnitude and number of acquisitions made by the Company. Forward-looking statements are based on currently available information and Kirby assumes no obligation to update any such statements. A list of additional risk factors can be found in Kirby's annual report on Form 10-K for the year ended December 31, 2023.

Kirby reports its financial results in accordance with generally accepted accounting principles (GAAP). However, Kirby believes that certain Non-GAAP financial measures are useful in managing Kirby's businesses and evaluating Kirby's performance. This presentation contains Non-GAAP financial measures including: EBITDA; operating income, excluding one-time items; earnings before taxes on income, excluding one-time items; net earnings attributable to Kirby, excluding one-time items; and diluted earnings per share, excluding one-time items, and free cash flow. Please see the Appendix for a reconciliation of GAAP to Non-GAAP financial measures.

# Distribution & Services has diversified sources of revenue across multiple industries

## Customer Industry Base

**Power Generation** - Distribution, services, manufactured and packaged equipment  
 32% of D&S segment revenues

- Power generation systems
- Power distribution equipment
- Specialized electrical distribution and control equipment
- Backup power rental

**Commercial & Industrial** - Distribution, services and packaged equipment  
 ~47% of D&S segment revenues  
 New equipment, parts, repair, and service for:

- Commercial marine
- Pleasure marine
- On-highway and refrigerated trucking
- Industrial markets
- Rail car movers

**Oil & Gas** - Distribution, services and manufactured equipment  
 ~21% of D&S segment revenues

- Electric fracturing (E-frac) equipment
- Dynamic Gas Blending (DGB) fracturing equipment
- Seismic equipment

Note: Revenue percentages based on 2024 Q3

# Power Generation

Kirby is a leading provider of power generation units across various industries

- Sells pre-packaged and fabricated power generation systems for emergency, standby, and auxiliary power
- Provides service and parts to nuclear power plants
- Manufactures mobile microgrid systems
- Rents back-up generator systems
- Key markets include:
  - Nuclear power industry
  - Domestic utilities
  - Data centers
  - Municipalities
  - Manufacturing plants
  - Retail and office complexes

# Power Generation Technology

Kirby manufactures power generation equipment that is creating new opportunities in oil and gas, commercial, and industrial end markets

## NATURAL GAS RECIPROCATING GENERATORS

- High Power Output: 2.5 MW
- High Mobility: 53' x 8.5' x 13.5'
- Wide Operating Range: Up to 122°F operation
- Sound attenuated environmental enclosure
- Scalable operation with multiple generators
- Integrates with existing S&S power distribution products
- 27.5% more fuel efficient than turbines assuming zero grid power supply at net zero consumption
- Reduces CO2e by 32% resulting in the cleanest power platform available for e-frac

## POWER DISTRIBUTION SYSTEMS

- Enables highly scalable power plants and microgrids
- Multiple local generator inputs
- Utility infeed connection and synchronization
- Energy storage system connection
- Proprietary power control and management system enables synchronization and remote control of all local inputs (ESS and generators)
- Self Contained: Drive-up and plug-in (no additional rig-up)
- Wide Operating Range: Up to 122°F operation
- Highly Scalable: Platform Based Design (allows for smaller systems or use of multiple systems to meet different power demands)

# Commercial and Industrial

Kirby is a leading distribution and services provider to key markets

## MARINE

- Major service and OEM new product and replacement parts provider for diesel engines and ancillary products
- Locations across the U.S.
- Key markets include:
  - Inland towboats and offshore tugboats
  - Offshore supply vessels
  - U.S. Coast Guard vessels
  - Fishing industry
  - Ferries
  - Pleasure yachts

## ON-HIGHWAY

- Distributes, sells parts, and services diesel engines and transmissions
- Distributes and services Thermo King refrigeration systems
- Rents refrigeration trailers
- Sells parts online via [DieselDash.com](http://DieselDash.com)
- Locations in the U.S. and Colombia
- Key markets include:
  - Trucking companies
  - Commercial truck fleets
  - Municipalities
  - Grocers and food banks

Kirby also provides distribution and services to rail, mining, and other industrial markets

# Oil and Gas

Kirby is one of the largest providers of equipment, service and parts to the oilfield

## MANUFACTURING

- Designs and manufactures a wide array of specialized equipment for hydraulic fracturing, acidizing, cementing, coiled tubing, nitrogen operations (OEM)
- Market leader in non-captive Electric Fracturing (E-Frac) equipment
  - Highest horsepower unit with 6,600 bhp (shown below)
- Remanufacturer of existing oilfield equipment
- New frac equipment offerings are often highly customized:
  - Electric units
  - Noise-reducing units
  - Dynamic gas blending units
- Sells new equipment into U.S. and international markets
- Developed proprietary controls solutions and telematics

## DISTRIBUTION

- Heavy duty cycle associated with fracturing leads to the need for regular equipment service and parts
- Distributor of new and rebuilt transmissions and diesel engines
  - Key OEMs include Allison Transmission, MTU, Volvo and Deutz
- Provider of major overhaul services for transmissions and diesel engines
- Provider of proprietary parts, 24x7 field service, and engineering support
- Provider of rental solutions including high capacity lift trucks, and industrial compressors
- Locations across key U.S. shale formations

Most pressure pumping equipment requires some form of major service every three to five years

# Distribution & Services is Recovering

The acquisition of S&S in 2017 generated a significant increase in earnings, but the 2019 industry downturn and COVID-19 adversely impacted profitability in recent years

Business activity started to inflect in FY 2021 and is expected to remain stable in 2024<sup>1</sup> despite near term oil and gas volatility

# 3Q 2024 Overview

## Financial Summary

\$ millions except earnings (loss) per share	3Q 2024	3Q 2023	Variance	%	2Q 2024	Variance	%
Revenues	\$ 831.1	\$ 764.8	\$ 66.3	9%	\$ 824.4	\$ 6.7	1%
Operating income	126.9	93.5	33.4	36%	120.5	6.4	5%
Net earnings attributable to Kirby	90.0	63.0	27.0	43%	83.9	6.1	7%
Earnings per share	1.55	1.05	0.50	48%	1.43	0.12	8%

- Solid market fundamentals in marine transportation and distribution and services
- Modest weather and navigational delays for marine and continued supply challenges for distribution and services were offset by solid execution
- Revenues up 9% year-over-year and earnings per share up 48% year-over-year
- Strong cash flow from operations of \$207 million with free cash flow of \$130 million; YTD free cash flow of \$263 million
- Further improved balance sheet with \$70 million reduction in debt and continued to repurchase stock with \$56 million of repurchases

# Marine Transportation – 2024 Fourth Quarter Outlook

Solid demand with minor headwinds, seasonal weather and marginal softness in the refining market

## ■ Inland

- Positive market dynamics due to limited new barge construction
- Barge utilization expected to be around 90% range
- Continued price improvements on term contracts due to mariner shortage and increasing cost of equipment
- Fourth quarter revenues flat to slightly down compared to the 2024 third quarter
- Fourth quarter operating margins expected to be down as compared to the 2024 third quarter
- Operating margins averaging just over 20% for the full year

## ■ Coastal

- Favorable market conditions with steady customer demand
- Barge utilization expected to be mid-90% range
- Fourth quarter revenues expected to be down mid-single digits when compared to 2024 third quarter given an increase in planned shipyards
- Fourth quarter operating margins are expected to be in the mid-to-high single digits

# Distribution & Services – 2024 Fourth Quarter Outlook

Near-term softness due to uncertainty in supply issues, and customers deferring maintenance

## ■ Power generation

- Strong growth in orders as demand in data center and backup power markets remains robust
- Volatile delivery schedule of new products due to extended lead times for certain OEM products
- Expected to be ~35-40% of segment revenues

## ■ Commercial and industrial

- Steady marine repair demand with softer on-highway demand
- Expected to be ~40-45% of segment revenues

## ■ Oil and gas

- Lower activity levels but might have reached the bottom
- Expect incremental demand in long term as rates of investment improves
- Expected to be ~15-20% of segment revenues

## ■ Segment Outlook

- Fourth quarter 2024 total segment revenues expected to be down in the mid-single digits sequentially
- Operating margins expected to be in the mid to high-single digits but lower than the 2024 third quarter due to product mix

# Adjusted EBITDA Per Share

- See Appendix for reconciliation of GAAP net earnings to Non-GAAP Adjusted EBITDA

Industry downturn      COVID-19 pandemic

<sup>(1)</sup> 2019 and 2020 Adjusted EBITDA earnings per share exclude one-time non-cash inventory write-down charges of \$35.5 million and \$8.0 million, respectively. For more information, see the Reconciliation of GAAP to Non-GAAP Financial Measures Excluding One-Time Items in the Appendix of this investor presentation.

# Cash Flow Generation

Kirby consistently generates free cash flow\*

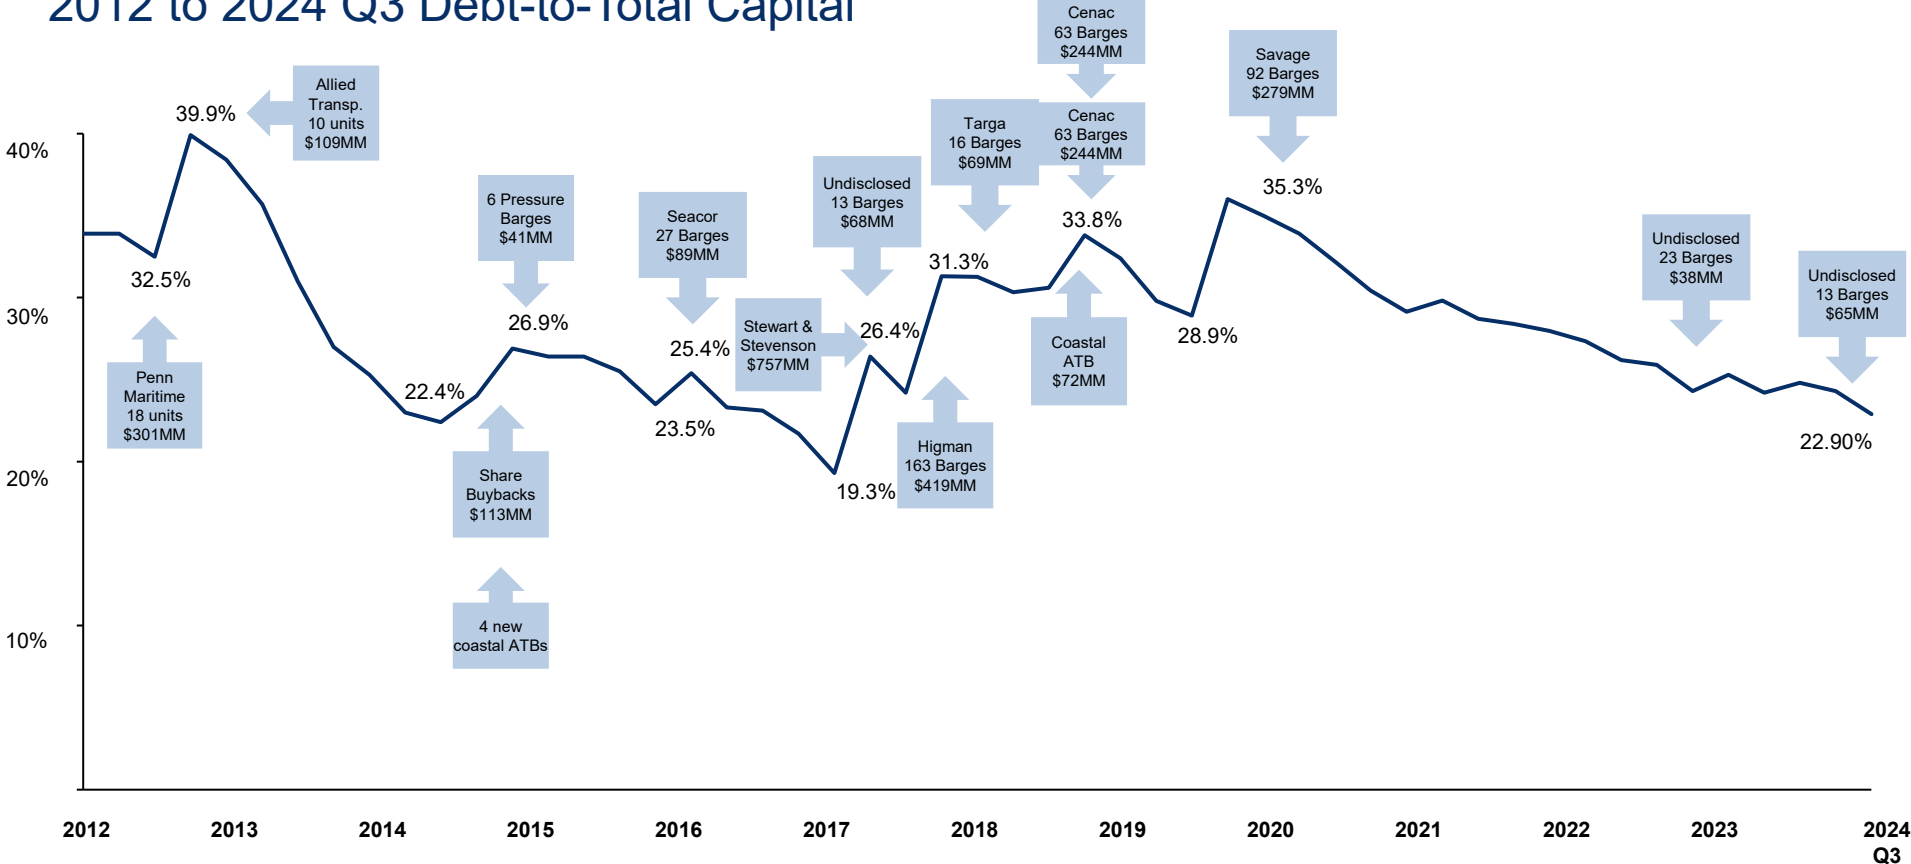

\* Free cash flow is defined as cash from operations less capital expenditures

# Reconciliation of GAAP to Non-GAAP Financial Measures

Kirby reports its financial results in accordance with generally accepted accounting principles (GAAP). However, Kirby believes that certain non-GAAP financial measures are useful in managing Kirby's businesses and evaluating Kirby's performance.

Adjusted EBITDA, which Kirby defines as net earnings (loss) attributable to Kirby before interest expense, taxes on income, depreciation and amortization, impairment of long-lived assets, and impairment of goodwill is used because of its wide acceptance as a measure of operating profitability before non-operating expenses (interest and taxes) and noncash charges (depreciation and amortization, impairment of long-lived assets, and impairment of goodwill). Adjusted EBITDA is one of the performance measures used in Kirby's incentive bonus plan. Adjusted EBITDA is also used by rating agencies in determining Kirby's credit rating and by analysts publishing research reports on Kirby, as well as by investors and investment bankers generally in valuing companies.

Kirby also uses certain non-GAAP financial measures to review performance excluding certain one-time items including: operating income, excluding one-time items; earnings before taxes on income, excluding one-time items; net earnings attributable to Kirby, excluding one-time items; and diluted earnings per share, excluding one-time items. Management believes that the exclusion of certain one-time items from these financial measures enables it and investors to assess and understand operating performance, especially when comparing those results with previous and subsequent periods or forecasting performance for future periods, primarily because management views the excluded items to be outside of the company's normal operating results.

Kirby also uses free cash flow, which is defined as net cash provided by operating activities less capital expenditures, to assess and forecast cash flow and to provide additional disclosures on the Company's liquidity as a result of uncertainty surrounding the impact of the COVID-19 pandemic on global and regional market conditions. Free cash flow does not imply the amount of residual cash flow available for discretionary expenditures as it excludes mandatory debt service requirements and other non-discretionary expenditures.

These non-GAAP financial measures are not a substitute for GAAP financial results and should only be considered in conjunction with Kirby's financial information that is presented in accordance with GAAP.

Quantitative reconciliations of GAAP to Non-GAAP financial measures are provided in the following tables.

<sup>(1)</sup> Ton miles indicate fleet productivity by measuring the distance (in miles) a loaded inland tank barge is moved. Example: A typical 30,000 barrel inland tank barge loaded with 3,300 tons of liquid cargo is moved 100 miles, thus generating 330,000 ton miles.

<sup>(2)</sup> Inland marine transportation revenues divided by ton miles. Example: Third quarter 2024 inland marine revenues of \$392.6 million divided by 3,135 million ton miles = 12.5 cents.

<sup>(3)</sup> Towboats operated, is the average number of owned and chartered inland towboats operated during the period.

<sup>(4)</sup> Delay days measures the lost time incurred by an inland tow (inland towboat and one or more inland tank barges) during transit. The measure includes transit delays caused by weather, lock congestion and other navigational factors.
